Name: Gaurav Kumar Singh

Registration Number: 19BCE2119

Course: Web Technology (ITE1002)

EXERCISE-1

INDEX

1) Introduction to HTML
    a. Create a webpage that prints your name to the screen.
    b. Create a webpage that prints the numbers 1 - 10 to the screen.
    c. Create a webpage and set its title to "This is a webpage".
    d. Create a webpage that prints the message "When was this webpage created? Check page's title for the answer." to the screen, and set the title of the page to the current date.
    e. Create a webpage that prints any text of your choice to the screen; do not include a head section in the code.
    f. Create a webpage which keeps track of the browsers information and do the following
        • refreshes its page in 5 seconds,
        • expires in a duration of time

a.

CODE

```
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta http-equiv="X-UA-Compatible" content="IE=edge">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>1a</title>
</head>
<body>
    <h3>Gaurav Kumar Singh</h3>
</body>
</html>
```

SCREENSHOTS
2) HTMLTEXT EXERCISES

a. Print your name in green
b. Print the numbers 1 - 10, each number being a different color.
c. Prints your name in a Tahoma font.
d. Display a part of a word with bold underline.
e. Print a paragraph with 4 - 5 sentences. Each sentence should be a different font
f. Print a paragraph that is a description of a book; include the title of the book as well as its author. Names and titles should be underlined, adjectives should be italicized and bolded.
g. Print your name to the screen with every letter being a different heading size.
h. Write a comment line on your code and make sure it is not displayed in the page
i. Print $a^2+b^2=2ab$
j. Print H_2O
k. Display a c code as it is in the page
l. Set the background color of the page as yellow
m. Set an image as background of the page
n. Set the font size as 10. Print it. Again try to decrease the font size. Check whether the font size is reduced.
o. Apply marquee for your name
p. Display a paragraph contents in a single line.

a.

ortant to know how to divide them properly into paragraphs.</font>
    </p>
</body>
</html>
```
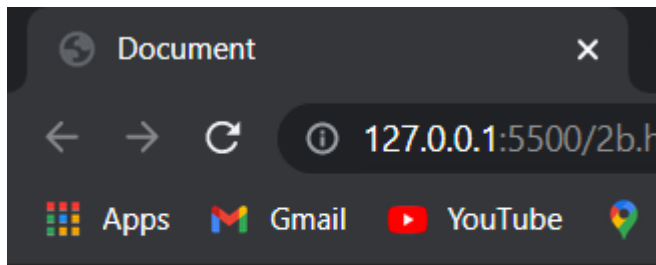

SCREENSHOTS

Your skills of writing Paragraph will make you a perfect man. If you look at any printed prose book, you will see that each chapter is divided up into sections, the first line of each being indented slightly to the right. These sections are called Paragraph. Chapters, essays and other prose compositions are broken up into paragraphs, to make the reading of them easier. **For the beginning of a new paragraph marks a change of topic or a step in the development of an argument or of a story.** In writing essays or other compositions, it is important to know how to divide them properly into paragraphs.

SCREENSHOTS

Dan Brown's Inferno

'Seek and ye shall find.' With these words echoing in his head, Harvard symbologist Robert Langdon awakes in a hospital bed with no recollection of where he is or how he got there. Nor can he explain the origin of the *macabre* object that is found hidden in his belongings. A threat to his life will propel him and a *young* doctor, Sienna Brooks, into a breakneck chase across the city of Florence.

    <p>This paragraph
        contains a lot of lines
        in the source code,
        but the browser
        ignores it.
    </p>
</body>
</html>
```

SCREENSHOTS

This paragraph contains a lot of lines in the source code, but the browser ignores it.

3) HTML TEXT FORMATTING, LISTS EXERCISES

a. Print the squares of the numbers 1 - 20. Each number should be on a separate line, next to it the number 2 superscripted, an equal sign and the result.

b. Prints 10 names with a line break between each name. The list should be alphabetized, and to do this place a subscripted number next to each name based on

   where it will go in the alphabetized list. (Example: $Alan_1$). Print first, the unalphabetized list with a subscript number next to each name, then the alphabetized list. Both lists should have an <h1> level heading.

c. Print two lists with any information you want. One list should be an ordered list, the other list should be an unordered list

d. Print a list which starts with 7 with the type i

e. Prints an h1 level heading followed by a horizontal line whose width is 100%. Below the horizontal line print a paragraph relating to the text in the heading.

f. Print a definition list with 5 items

g. Print two addresses in the same format used on the front of envelopes (senders address in top left corner, receivers address in the center)

h. Print ten acronyms and abbreviations of your choosing, each separated by two lines. Specify the data that the abbreviations and acronyms represent

a.

CODE

```html
<!DOCTYPE html>
<html lang="en">

- **[PAYMENT](#)**
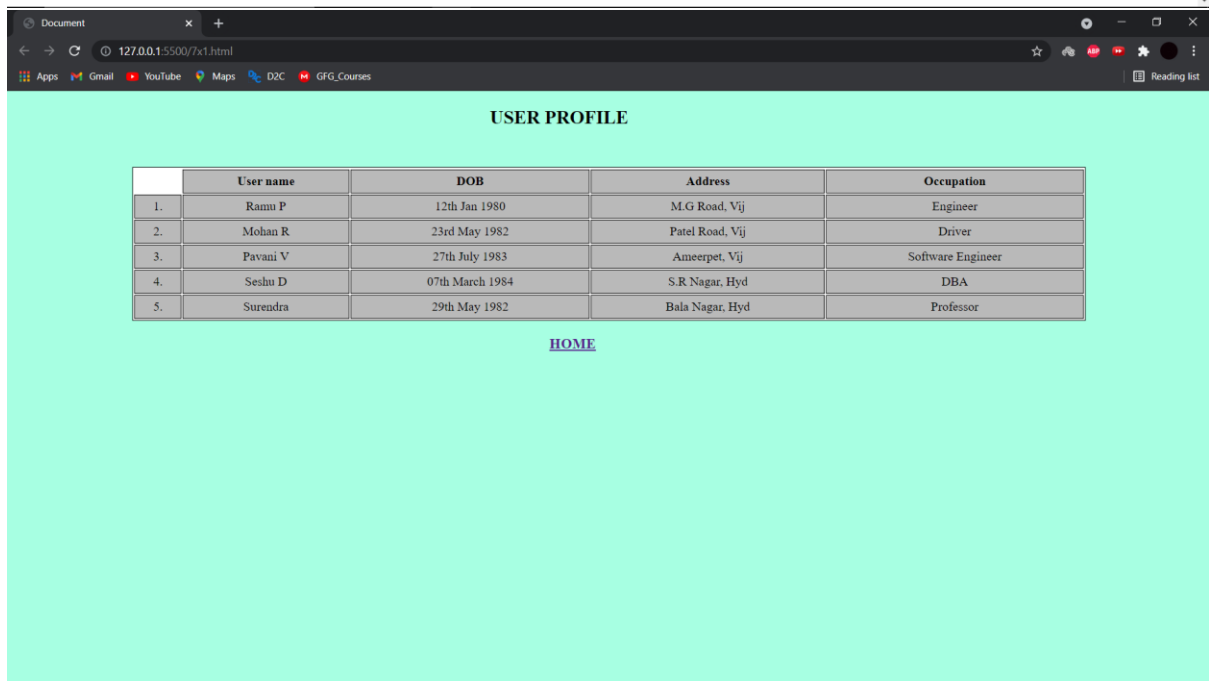

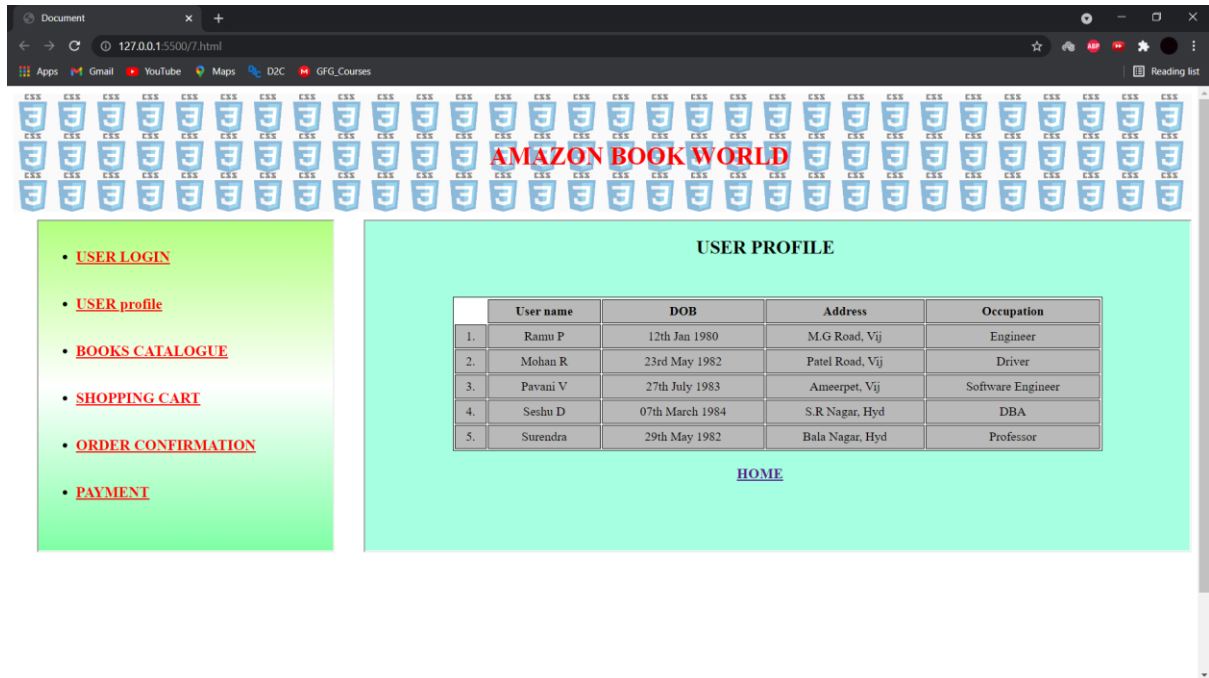

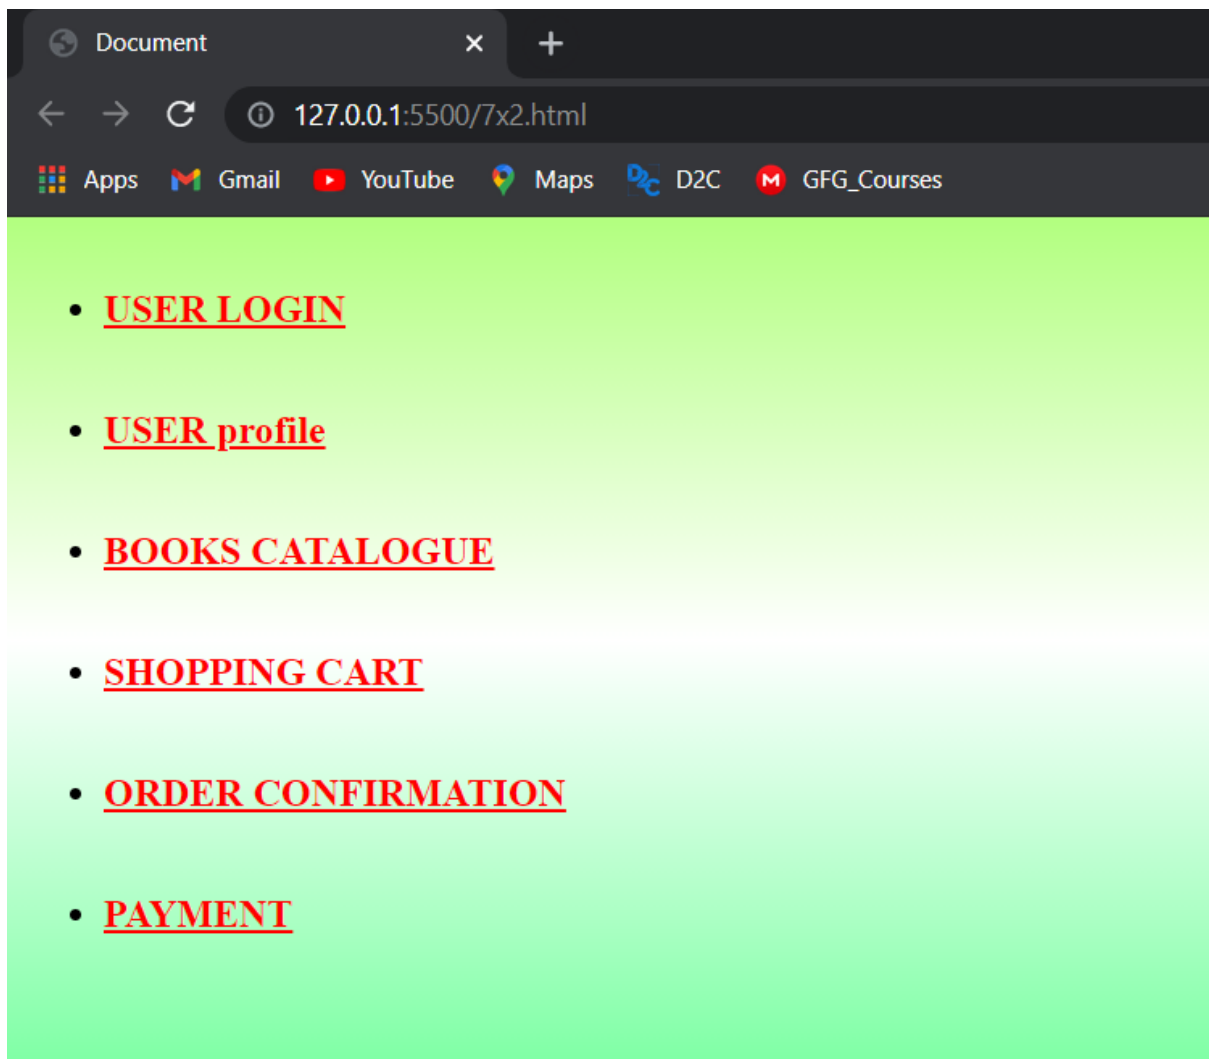

8) Create an external style sheet named as "external.css" and provide some styles for h2, p and body tags. Create an html file named as "welcome.html" and link the external style sheet. Include internal style sheet for body tags. Include a <p> tags with inline style sheet.

CODE

HTML

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta http-equiv="X-UA-Compatible" content="IE=edge">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Document</title>
    <link href="external.css" rel="stylesheet">
    <style>
        body{
            background-color: gray;
        }
    </style>
</head>
<body>
    <div class="container">
        <div class="main">
            <h2 style="padding-left:10px;">Hello World!</h2>
            <p style="font-size: 18px; font-
family: 'Courier New', Courier, monospace; padding-
left:40px;">The example contains some advanced CSS methods you may
                not have learned yet. But, we will explain these methods
                in a later chapter in the tutorial.
            </p>
        </div>
```

```html
        <div class="box">
            <p style="font-size: 18px; font-
family: 'Courier New', Courier, monospace; font-
weight: bold;">This is some text in a paragraph.</p>
        </div>
    </div>
</body>
</html>
```

CSS

```css
.container{
    margin-top: 40px;
    margin-right: 50px;
    height:100px;
    width:600px;
    float: right;
}

.main{
    background-color: lightgray;
    padding: 5px;
}

.box{
    margin-top: 8px;
    border: 7px solid black;
    border-style: dotted solid dashed double;
}
```

SCREENSHOTS
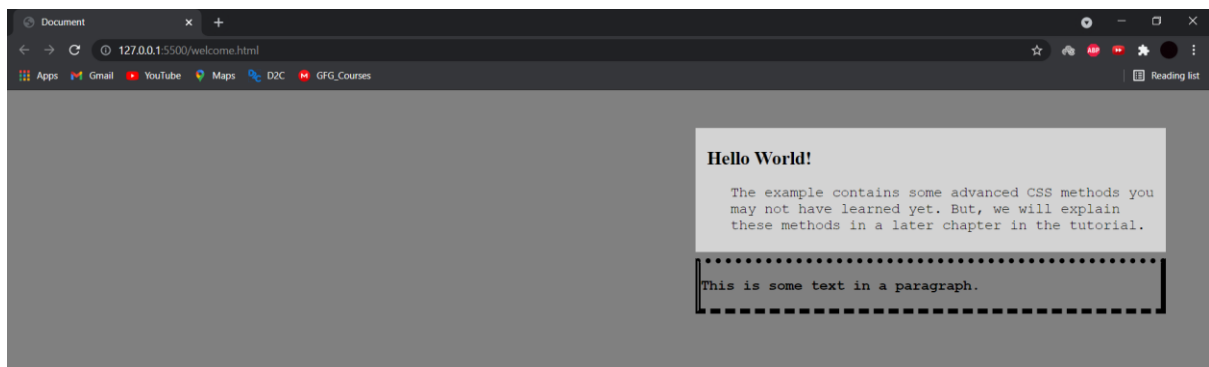

9) Write the **CSS code** necessary to recreate the following appearance on-screen, exactly as shown.
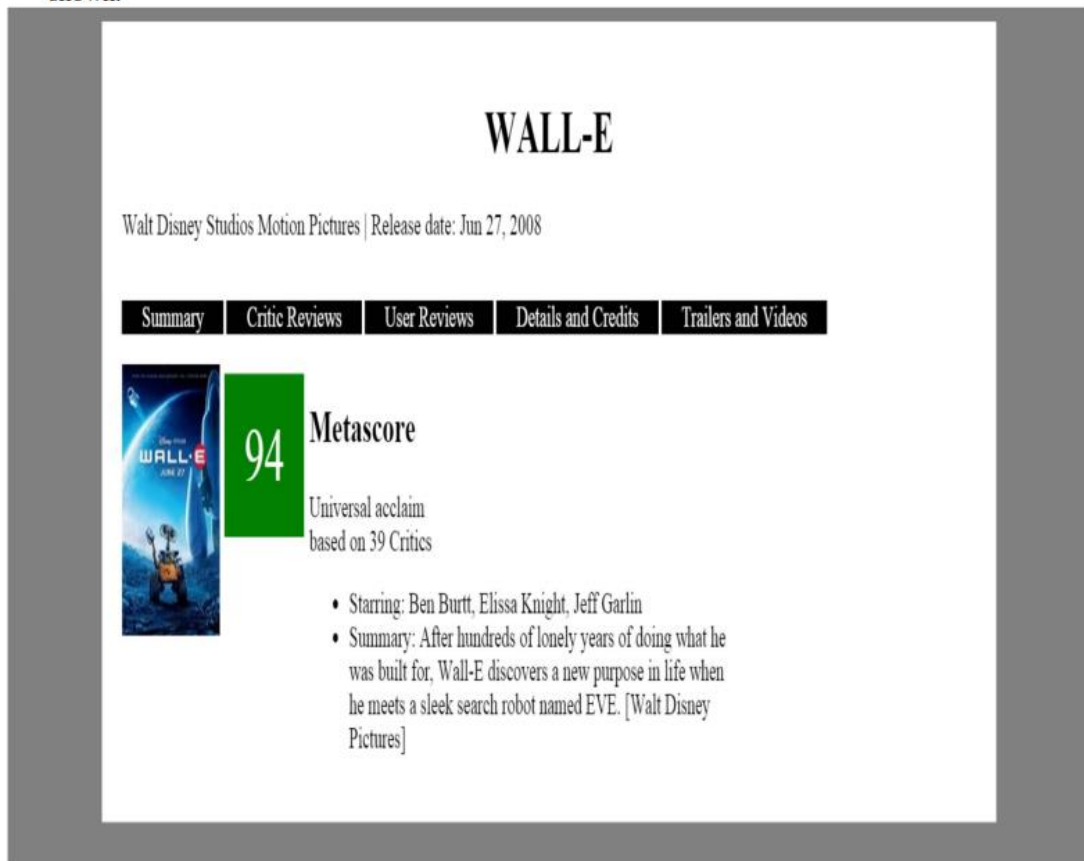

- The menu items (*Summary* to *Trailers and Videos*) are white text on a black background. There is 20px space between the words and the right and left sides of their black boxes. There is 3px of blank space to the right of each.
- The score information should be 50% wide.
- The movie rating has a green background and white text. The number is in 30pt font. There is 20px space between the number and the edges of the green background. There is 5px blank space around the green background.

- The background color of the page is gray but the background color of the area containing everything is white. The white area is 80% wide and centered. There is 20px of space between the edge of the white background and everything inside it.
